The International Conference on Networking (ICN01) is the first conference in its series aimed at stimulating technical exchange in the emerging and important field of networking. On behalf of the International Advisory Committee, it is our great pleasure to welcome you to the International Conference on Networking. Integration of fixed and portable wireless access into IP and ATM networks presents a cost effective and efficient way to provide seamless end to end connectivity and ubiquitous access in a market where demands on Mobile and Cellular Networks have grown rapidly and predicted to generate billions of dollars in revenue. The deployment of broadband IP based technologies over Dense Wavelength Division Multiplexing (DWDM) and integration of IP with broadband wireless access networks (BWANs) are becoming increasingly important. In addition, fixed core IP/ATM networks are constructed with recent move to IP/MPLS over DWDM. Moreover, mobility introduces further challenges in the area that have neither been fully understood nor resolved in the preceding network generation. This first Conference ICN01 has been very well perceived by the International networking community. A total of 300 papers from 39 countries were submitted, from which 168 have been accepted. Each paper has been reviewed by several members of the scientific Program Committee.

The book will cover the most important zoonoses with a public health impact and debate actual developments in this field from a One Health perspective. The outline of the book follows a “ setting ” approach, i.e. special settings of zoonoses with a public health aspect, rather than presenting a simple textbook of an encyclopedic character. Main chapters will deal with zoonoses in the food chain including a special focus on the emerging issue of antibiotic resistance, with zoonoses in domestic and pet animals, in wildlife animal species (including bats as an important infectious agent multiplier), influenza and tuberculosis as most prominent zoonoses, and zoonotic pathogens as bioterroristic agents. Special interest chapters debate non-resolved and currently hotly debated zoonoses (e.g. M. Crohn/paratuberculosis, chronic botulism) as well as the economic and ecological aspects of zoonoses. Third generation coaching proposes a form of dialogue where coach and coachee are focused on creating space for reflection through collaborative practices and less concerned with fabricating quick solutions. Aspiring to achieve moments of symmetry between coach and coachee, where their dialogue is driven by a strong emphasis on meaning-making, values, aspirations and identity issues. Coach and coachee meet as fellow-humans in a genuine dialogue. Marking a new trend in coaching, based on the acknowledgement of changes in society, learning and knowledge production, as well as leadership, while distinguishing itself from the existing models (pop coaching, GROW model, etc.). Third generation

coaching is based on a fresh analysis of our society – a society that is characterized by diversification, identity challenges, abolition of the monopoly of knowledge, lifelong learning, and the necessity for self-reflection. Providing quality material to guide ambitious practitioners and high level coaching education programs, in an accessible format. A Guide to Third Generation Coaching advocates a revisited and innovative approach to coaching and coaching psychology, advantageous for learners and practitioners alike, by supporting the reader as a reflective practitioner. ” In this insightful book Reinhard Stelter takes coaching to a new level. With its new perspective, it will make an outstanding contribution to the field. ” Prof Stephen Palmer, Centre for Coaching, London, UK, President of the International Society for Coaching Psychology (ISCP) “ This book is a wonderful contribution to further theoretical understanding and evidence-based practice within Coaching and Coaching Psychology. Reinhard provides us with a look at the foundations contributing to this field, the benefit of his experience and learning, and the evolution of thinking to our current state. Whether you are a coach, coaching psychologist, leader, manager or student, you will find this an excellent resource to expand your thinking, reflection, exploration, and learning on your journey. ” Diane Brennan, MBA, MCC, Past-President International Coach Federation (ICF) in 2008 “ A thoughtful and wide ranging journey through the philosophy of coaching. Professor Stelter brings positive psychology, dialogue, and narrative approaches together into a model of coaching designed to meet the needs of clients in today ’ s world. ” Dr. Michael Cavanagh, MCLinPsy, PhD, Deputy Director, Coaching Psychology Unit, School of Psychology, The University of Sydney Reference to the design of new insecticides nontoxic to the environment and the public emphasizing optimal food production with greater safety. Encyclopedia of Endocrine Diseases, Second Edition, comprehensively reviews the extensive spectrum of diseases and disorders that can occur within the endocrine system. It serves as a useful and comprehensive source of information spanning the many and varied aspects of the endocrine end metabolic system. Students will find a concise description of the physiology and pathophysiology of endocrine and metabolic functions, as well as their diseases. Each article provides a comprehensive overview of the selected topic to inform a broad spectrum of readers, from advanced undergraduate students, to research professionals. Chapters explore the latest advances and hot topics that have emerged in recent years, such as the molecular basis of endocrine and metabolic diseases (mutations, epigenetics, signaling), the pathogenesis and therapy of common endocrine diseases (e.g. diabetes and endocrine malignancies), new technologies in endocrine research, new methods of treatment, and endocrine toxicology/disruptors. Covers all aspects of endocrinology and metabolism Incorporates perspectives from experts working within the domains of biomedicine (e.g. physiology, pharmacology and toxicology, immunology, genetics) and clinical sciences to provide readers with reputable, multi-disciplinary content from domain

The first edition of this book appeared in the Federal Republic of Germany in 1984. and in English translation as "Computer: A Challenge for Business Administration" in 1985. This book, which is a translation of the fourth German edition, has been comprehensively revised. As a result both the character and the expected audience of the book have changed, which is reflected in the alteration to the title. This book addresses itself to issues arising from the research areas of both information systems and computer science. Computer science departments are primarily concerned with the development of EDP techniques, and the business economics aspects remain largely ignored. The emphasis in information systems departments is placed on the investigation of the business economic impact of the use of already existing systems. This strongly empirical approach is accompanied by a disinclination to consider actual system design: this is considered the responsibility of the software houses. This partitioning, however, leaves untapped the considerable potential which could be realized by an interdisciplinary approach from computer science and business

economics. An isolated approach neglects both the effects that business economics can have on the implementation of EDP techniques. and the structural impact of EDP on business economics. This book constitutes the refereed proceedings of the 7th IEEE International Conference on High Speed Networking and Multimedia Communications, HSNMC 2004, held in Toulouse, France in June/July 2004. The 101 revised full papers presented were carefully reviewed and selected from 266 submissions. The papers are organized in topical sections on quality of service, QoS, DiffServ, and performance analysis; scheduling and resource allocation; MPLS; routing and multicast; mobile networks, mobile IP, 3G/UMTS; IEEE 802.11 networks and ad hoc networks; wireless and WLAN; optical networks and WDM; applications and software development; and security and privacy.
