In this sparkling collection of nineteen stories, the bestselling author of Slammerkin returns to contemporary affairs, exposing the private dilemmas that result from some of our most public controversies. A man finds God and finally wants to father a child-only his wife is now forty-two years old. A coach's son discovers his sexuality on the football field. A roommate's bizarre secret liberates a repressed young woman. From the unforeseen consequences of a polite social lie to the turmoil caused by the hair on a woman's chin, Donoghue dramatizes the seemingly small acts upon which our lives often turn. Many of these stories involve animals and what they mean to us, or babies and whether to have them; some replay biblical plots in modern contexts. With characters old, young, straight, gay, and simply confused, Donoghue dazzles with her range and her ability to touch lightly but delve deeply into the human condition. Delving into more technical topics, this book equips readers with advanced data mining methods that are needed to successfully translate raw data into smart decisions across various fields of research including business, engineering, finance, and the social sciences. Following a comprehensive introduction that details how to define a problem, perform an analysis, and deploy the results, Making Sense of Data II addresses the following key techniques for advanced data analysis: Data Visualization reviews principles and methods for understanding and communicating data through the use of visualization including single variables, the relationship between two or more variables, groupings in data, and dynamic approaches to interacting with data through graphical user interfaces. Clustering outlines common approaches to clustering data sets and provides detailed explanations of methods for determining the distance between observations and procedures for clustering observations. Agglomerative hierarchical clustering, partitioned-based clustering, and fuzzy clustering are also discussed. Predictive Analytics presents a discussion on how to build and assess models, along with a series of predictive analytics that can be used in a variety of situations including principal component analysis, multiple linear regression, discriminate analysis, logistic regression, and Naïve Bayes. Applications demonstrates the current uses of data mining across a wide range of industries and features case studies that illustrate the related applications in real-world scenarios. Each method is discussed within the context of a data mining process including defining the problem and deploying the results, and readers are provided with guidance on when and how each method should be used. The related Web site for the series (www.makingsenseofdata.com) provides a hands-on data analysis and data mining experience. Readers wishing to gain more practical

experience will benefit from the tutorial section of the book in conjunction with the Traceis™ software, which is freely available online. Original. On the azure blue morning of 9/11 the skies were pronounced "severe clear," in the parlance of airline pilots; a gorgeous day for flying. Nearly 5,000 flights were cruising the skies over America when FAA Operations Manager Ben Sliney arrived at the Command Center for his first day on that job. He could never have anticipated the historic drama that was about to unfold as Americans who found themselves on the front lines of a totally unprecedented attack on our homeland sprang into action to defend our country and save lives. In this gripping moment-to-moment narrative, based on groundbreaking reporting, Lynn Spencer brings the inspiring true drama of their unflinching and heroic response vividly to life for the first time, taking us right inside the airliner cockpits and control towers, the fighter jets and the military battle cabs. She makes vital corrections to the findings of the 9/11 Commission Report, and reveals many startling, utterly unknown elements of the story. As a commercial pilot herself, for whom the attacks hit terribly close to home, she knew that the true scope and nature of the response so brilliantly improvised that morning by those in the thick of the action -- with so little guidance from those at the highest levels -- had not at all been captured by the news coverage or the 9/11 Commission. To get to the truth, she went on a three-year quest, interviewing hundreds of key players, listening to untold hours of tapes and pouring through voluminous transcripts to re-create each heart-stopping moment as it happened through their eyes and in their words as the drama unfolded. From the shocking moment at 7:59 a.m. that American 11 fails to respond to a controller's call, until the last commercial flight has safely landed and military jets rule the skies, all Americans will find themselves deeply moved and amazed by the grace and fierce determination of these steely men and women as they draw on all of their exquisite training to grasp, through the fog of war, what is happening, put their lives on the line, and mount an astonishing response. This beautifully crafted and deeply affecting account of the full story of their courageous actions is a vital addition to the country's understanding of a day that has forever changed our nation. Chip Block, the hero of Parts, is back, and still worried about falling apart based on the things he hears. This time he's made a list of all the strange, crazy things he's heard people say: "I lost my head." "My nose is running." "I sang my heart out. . . ." It's scary stuff, but he has a plan for making sure he doesn't accidentally leave any of his parts behind. A hilarious sequel to the wildly popular Parts and More Parts. As they prepare for their marriage, Katie and Tom find the upcoming

ceremony threatened by Tom's werewolf former girlfriend who is stalking Katie, Katie's hostile brothers, a freak blizzard, the latest schemes of the Thrall, and her dead former fiancé, who may not be so dead after all, in the sequel to Touch of Madness and Touch of Evil.
